Project Report

DIGITAL LITERACY

Akaksh Samdani | 25BCG10033 | CSE0001

TASK 1 – INFOGRAPHIC

- For Task 1, I created a digital literacy infographic using Canva. The infographic focused on explaining the concept of digital literacy and its importance for students. It included three main sections: the meaning of digital literacy, useful digital tools, and safe internet practices.

- In the first section, I defined digital literacy as the ability to use digital tools effectively and responsibly. The second section highlighted tools such as online document editors and coding platforms that help students in their studies. The third section emphasized internet safety practices, including using strong passwords and avoiding suspicious links.

- Designing the infographic was an interesting experience as it required balancing visual appeal with informative content. One challenge I faced was selecting the right layout and keeping the design clean without overcrowding it. Overall, this task helped me understand how to present information visually in an effective way.

TASK 2 – DIGITAL PORTFOLIO

- In Task 2, I created and updated my profiles on GitHub, LinkedIn, and HackerRank. These platforms are essential for building a professional online presence.
- GitHub is used to showcase projects and manage code repositories, making it useful for collaboration and version control. LinkedIn is a professional networking platform where students can connect with peers, professors, and industry professionals. HackerRank is a coding practice platform that helps improve programming skills through challenges and competitions.
- Setting up these profiles helped me understand the importance of maintaining a digital identity. Over the next four years, I plan to regularly update my GitHub with projects, build a strong network on LinkedIn, and improve my coding skills through HackerRank. This task showed me how these platforms can contribute to career growth and learning.

TASK 3– PLATFORMS

For Task 3, I explored coding and collaboration platforms. I used HackerRank to solve a beginner-level programming problem, which helped me understand basic problem-solving techniques. It was a good introduction to coding platforms and improved my confidence.

Additionally, I created a quiz using Google Forms to test digital literacy awareness. The form included five questions, such as multiple-choice and short-answer questions, covering topics like internet safety and digital tools. I also viewed the responses through the linked Google Sheet.

This task was helpful in understanding how online tools can be used for both learning and collaboration. Coding platforms help develop logical thinking, while tools like Google Forms make it easy to collect and analyze data. These skills will be useful for academic projects and teamwork in the future.

TASK 4 – EMAIL ETIQUETTE

Task 4 focused on professional communication and email etiquette. I wrote two emails: one requesting an assignment extension and another applying for a summer internship. Both emails followed proper structure, including a clear subject line, polite greeting, well-organized body, and professional sign-off.

A situation where poor communication can cause problems is when a student sends an email to a professor without proper greeting or uses informal language. This can create a negative impression and may lead to the request being ignored or rejected. To avoid such issues, it is important to maintain a respectful tone, be clear in communication, and follow proper email format.

This task helped me understand the importance of professionalism in digital communication.

TASK 5 – PLATFORMS

While working on Task 5, I learned about phishing, a common type of cybercrime where attackers trick users into sharing sensitive information. What surprised me most was how easily people can fall victim to such scams due to lack of awareness.

I realized that even simple actions, like clicking on unknown links or sharing OTPs, can lead to serious consequences such as financial loss or identity theft. One habit I will change is being more cautious while interacting with unknown messages or emails and always verifying the authenticity of sources before sharing any personal information.

This task made me more aware of online threats and the importance of practicing safe digital habits.

CONCLUSION

This project provided a comprehensive understanding of digital literacy and its practical applications. Through various tasks, I learned how to use digital tools effectively, create a professional online presence, communicate properly, and stay safe online. Each activity contributed to building essential skills that will be valuable throughout my academic and professional journey. Overall, the project enhanced my awareness of responsible digital behavior and prepared me to navigate the digital world with confidence.
